**NON-FINAL OFFICIAL ACTION**

***Status of the Claims***

Claims 1-6 are rejected under 35 USC §102.

***Rejections under 35 USC §102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Sony (European Patent Application Publication EP 0 837 472 A2). As per the claims Sony discloses:

1. Method for recording data on a write once record carrier with sequential write access and a recorded area indicator and a last recorded data block with a location, comprising the steps of:

recording information in a data block (column 6, lines 50-56)

updating the recorded area indicator to reflect the recording of information in the data block (column 8, lines 42-45 hints at this inherent feature of DVD-RAM)

characterized in that the method further comprises the following steps if a data block with write error is detected (column 8, lines 48-53; column 9, lines 8-15):

determining the location of the last recorded data block using information from the recorded area indicator (column 9, lines 16-23);

searching for an empty data block sequentially following the last recorded data block (column 9, lines 16-23)

recording information in the empty data block sequentially following the last recorded data block (column 9, lines 16-23).

2. Method as claimed in claim 1, characterized in that the information from the recorded area indicator comprises an indication of a set of contiguous data blocks comprising the last recorded data block (column 10, lines 44-58).

3. Method as claimed in claim 2, characterized in that based on the indication of a set of contiguous data blocks comprising the last recorded data block the set of contiguous data blocks is searched for the location of the last recorded data block (column 10, lines 23-45).

Claims 4-6 are the recorder for implementing the method of recording of claims 1-3 and are rejected on the same grounds.
